Forecast for Monday 04 Jul 2022

Weather: A cloudy start to the day with periods of mist and fog on the hills and the risk of an isolated light shower through the morning. Generally dry by late-morning as cloud breaks up somewhat to allow sunny intervals throughout the afternoon and into the evening.

Chance of cloud-free hill tops above 800m: 30% initially, rising to above 80% by late morning.

Low Cloud and visibility: Broken cloud shrouding summits down to around 400m during the first half of the morning. This cloud then lifting to above the summits for late morning and the remainder of the day. Poor visibility at lower levels should any showers pass over in the morning, but largely very good from the afternoon with clear views of surrounding hills.

Meteorologist's View

The breeze may make your skin feel cool but UV levels are still high, so be sure to wear appropriate protection.

Forecast for Tuesday 05 Jul 2022

Weather: Cloud soon spreading across the park through the early hours, lowering to create foggy conditions on some hills from mid-morning to mid-afternoon. This cloud accompanied by patches of drizzle and light rain. Turning largely dry from mid-afternoon as cloud breaks up, allowing for some bright spells, but cloud turning more widespread again into the evening.

Maximum wind: 15mph westerly winds on the summits.

Chance of cloud-free hill tops above 800m: 80% in the early hours, dropping to 30% during the middle of the day, rising to 60% in the evening.

Low Cloud and visibility: Cloud lowering during the morning, falling to 400-500m by mid-morning and covering slopes above this through to mid-afternoon. Some clearer interludes developing later in the afternoon as cloud rises to 800m. Visibility below cloud bases will also turn poor in any rain or drizzle, becoming good as it dries up later.

Temperature: **Valleys:** Plus 10 Celsius rising to plus 18 Celsius.
At 800m: Plus 4 Celsius, rising to plus 10 Celsius.
Freezing level: Above the summits.
